STATEWIDE CURRENT SITUATION: In NWS Houston, warm and humid weather to start the week, but a strong cold front is expected to move through the area late Tuesday night into early Wednesday morning. A much cooler and drier air mass will settle over Southeast Texas through the end of the week.

President Trump has amended the Texas Disaster Declaration to make additional disaster assistance available to the State of Texas. This action authorizes 90% Federal cost share for debris removal, and 100% Federal cost share for emergency protective measures for 30 days from the start of the incident period and then a 90% cost share thereafter.

Governor Abbott has issued a proclamation condemning the practice of price gouging, and reminded Texans that such practices are illegal and will be investigated and punished.

Governor Abbott has issued a suspension of specific vehicle titling and registration requirements for the next 45 days in the 58 counties specified in the state's disaster declaration. As a consequence, vehicle titling and registration expirations are suspended in order to relieve that burden upon Texans. Law enforcement will not issue citations for expired registration in all affected counties until October 16, 2017.

Governor Abbott has issued a proclamation to allow the Port Aransas Independent School District Board of Trustees to conduct a telephone meeting within a reasonable distance of the district.

Governor Abbott issued a disaster declaration for the counties of: Angelina, Atascosa, Aransas, Austin, Bastrop, Bee, Bexar, Brazos, Burleson, Caldwell, Cameron, Calhoun, Chambers, Colorado, Comal, Brazoria, DeWitt, Fayette, Fort Bend, Galveston, Goliad, Gonzalez, Grimes, Guadalupe, Hardin, Harris, Jackson, Jasper, Jefferson, Jim Wells, Karnes, Kerr, Kleberg, Lavaca, Lee, Leon, Liberty, Live Oak, Madison, Matagorda, Montgomery, Newton, Nueces, Orange, Refugio, San Patricio, Polk, Sabine, San Jacinto, Tyler, Trinity, Victoria, Walker, Waller, Washington, Wharton, Willacy and Wilson.

Governor Abbott requested and was approved for a Presidential Disaster Declaration for the following counties: Aransas, Austin, Bastrop, Bee, Brazoria, Calhoun, Chambers, Colorado, DeWitt, Fayette, Fort Bend, Galveston, Goliad, Gonzales, Hardin, Harris, Jackson, Jasper, Jefferson, Karnes, Kleberg, Lavaca, Lee, Liberty, Matagorda, Montgomery, Newton, Nueces, Orange, Sabine, San Jacinto, San Patricio, Refugio, Victoria, Waller, and Wharton counties for Individual Assistance and assistance with debris removal and emergency protective measures (Categories A and B), including direct federal assistance, under the Public Assistance program.

Bexar, Dallas, Tarrant and Travis counties are eligible for emergency protective measures (Category B), including direct federal assistance, under the Public Assistance program.

Significant River Flood Outlook

Valid: 9/4/2017 - 9/9/2017

West Gulf River Forecast Center 9/4/2017 11:17:17 AM

**SIGNIFICANT RIVER
FLOODING POSSIBLE.**

**SIGNIFICANT RIVER
FLOODING LIKELY.**

**SIGNIFICANT RIVER
FLOODING OCCURRING
OR IS IMMINENT.**

Significant River Flooding Impacts include:
Roads adversely affected. Residential,
commercial, industrial, and/or agricultural
areas affected. May require evacuation of people.

NOTE: Flash Flooding or Minor River Flooding
will NOT be included in this outlook.

Neches Basin – Record Flooding – B.A. Steinhagen continues to release water downstream to pass the receding flood waters from upstream, but they are continuing to cut release flows back. Evadale is down to moderate impacts while Village Creek continues to fall back in banks.

Downstream, Pine Island Bayou continues to recede but will be in major for another day or so. USGS has installed a temporary gage at the Salt Water Barrier to observe the flood recede and begin to recede at Beaumont. Flood wave should drop below major later this week.

Brazos Basin – Major Flooding – The largest impacts will be continuing on the lower end of the Brazos at: the Brazos River at Richmond (RMOT2), Brazos River at Rosharon (ROST2), and Brazos River at West Columbia (WCBT2). The river is crested or near crest at these forecast points, and the focus will shift to timing the recession below critical impact elevations.

For the Brazos at Richmond (RMOT2) the crest was observed early Friday morning and the river will continue to fall slowly. The river was falling below major flood stage Monday morning, and will continue falling, reaching below moderate flood stage by early Tuesday.

For the Brazos at Rosharon (ROST2) the river has experienced its second crest from upstream routed flow, and is currently within major flood. Field reports at Sienna, which is upstream of Rosharon, indicate it has fallen 2 feet since the crest. This means falling stages can be expected to continue at Rosharon, and a significant drop to below major flood levels can be expected within the next few days. At this time this fall is forecast for late this week, but an earlier recession is possible based on the information upstream.

For the Brazos at West Columbia (WCBT2), the forecast trend continues to hold as a slight rising pattern to 31 feet by Tuesday morning. There is significantly more uncertainty with this forecast, as compared to the RMOT2 and ROST2 forecast, because: (1) there is no measured rating curve (2) short duration of record (3) inter-basin transfer between Oyster Creek, San Bernard and Colorado River systems to form the "San Brazorado River." This pool of water is behaving more like a lake and not following typical hydrologically modeled river behavior. This pool of water is influencing both the lower San Bernard and lower Brazos forecasts. More analysis on this point at WCBT2 will be conducted this afternoon to firm up stage and timing. NWS predicts will begin a drastic decline on Friday.

San Jacinto Basin – Major Flooding – All of the basins across the San Jacinto system, including the larger creeks and bayous, have crested. Lake Conroe and Lake Houston continue to reduce releases. Addicks and Barker Reservoirs will continue to release, with Buffalo Bayou downstream remaining in flood stage/above criteria until further notice. The forecast point at Piney Point (PPTT2) remains in major flood.

San Bernard Basin – Major Flooding – Stream gages on the San Bernard including East Bernard (EBBT2), Boling (BOLT2), and the new stream gage upstream of Sweeney (OCNT2) are all slowly falling at this time. Therefore Sweeney (SWYT2) should also be falling, although there are no current observations from there to confirm this. Boling and Sweeney remain in major flood.

Trinity Basin – Major Flooding – Lake Livingston continues to decrease its releases. Local runoff is also tapering off. The mainstem of the Trinity River and its tributaries have crested and are now falling at all locations. Flooding at Liberty (LBYT2) has or will soon drop below major to moderate.

Sabine Basin – Major Flooding – Major flooding continues on the lower Sabine River system from Bon Wier downstream through Deweyville (DWYT2) and Orange (ORNT2). Water should remain high for a few days in this region as the flood wave moves downstream.

OPERATIONAL PRIORITIES:

1. Protect life and property.
2. Support rapid & effective response.
3. Collect and disseminate accurate incident information to improve decision-making.
4. Accurately track incident costs associated with assigned resources for cost recovery.
